

Make a bright idea, a brilliant one.
Bring genius into your home by
adding Reposit to your battery.

Repositpower.com

Bring genius into your home by adding Reposit to your battery.

Reposit software works with your battery and inverter, and learns your energy habits to lower your power bills.

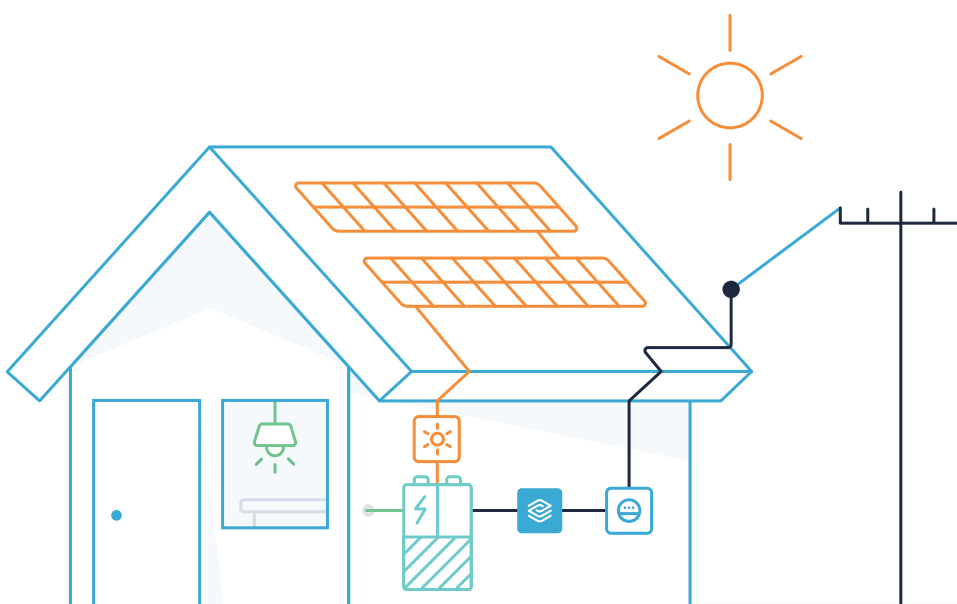

Reposit will store the excess solar you produce during the day, so you can use cheap and clean solar energy at night.

Reposit will help you sell your power back to the grid when the prices are highest – earning you GridCredits™ and lower your power bill.

Actual size

Be less dependent on the grid with Reposit.

No ongoing costs

5 Year WARRANTY

Reposit Features

Credit when credit's due.

Become a smart consumer and sell excess power back to the electricity grid when prices are highest. Earn GridCredits* and lower your power bill.

It's high time for lower bills.

Reduce your reliance on the grid with Reposit. Reposit knows how much solar power your system will produce and constantly makes decisions to lower your energy costs.

Checking in when you're out.

Know your energy consumption, solar generation, battery behaviour and energy costs in real-time. Monitor your usage and get predictions 24 hours in advance.

A quick installation. A lifetime of savings.

Getting Reposit in your home is easy. Our trained installation partners will have it up and running in your household in no time.

Making a world of difference.

Join the community of homeowners that are revolutionising the electricity grid.

Earn GridCredits and receive higher prices for your solar and battery exports.*

Energy intelligence – Reposit learns your energy use, and adapts your system to meet your needs.

Dynamic Time-of-Use Optimisation – Automatic load and weather predictions keep your battery filled from cheap energy.

Individual circuit monitoring (hot water, pool pump etc) and divert excess solar power to your electric hot water.#

Daily usage

Reposit monitoring App – see your energy consumption, solar generation, battery behaviour and energy costs in real-time on your smart phone, tablet or computer.

* Visit the Reposit website for participating GridCredits electricity retailers. GridCredits™ currently only available in NSW, VIC, South East QLD (Energex), SA and ACT.

Optional feature coming soon.
